

A continuing education opportunity by the Program Office for Laboratory Quality Management

Registration starts September 1, 2024
Course starts January 22, 2025

TOPICS COVERED

- Appropriate selection and collection of microbiology specimens
- Isolation and accurate identification of clinically relevant bacterial pathogens
- Classification of antimicrobials; general mechanisms of action and resistance
- Antimicrobial susceptibility methods
- Understanding breakpoints, interpretive categories, and international standards & guidelines
- Internal quality control and quality assurance for AST; cumulative antibiograms
- Detection of intrinsic resistance, mechanisms of resistance and appropriate reporting.
- Reporting of antimicrobial susceptibility testing results.
- Clinical applications of antimicrobial susceptibility testing
- Global surveillance systems (GLASS) and networks (One Health)
- Antifungals susceptibility testing

COURSE FEE: CAD 1450

COURSE FORMAT

- Asynchronous, completely online; 12 weeks long.
- Interactive, case studies, discussions.
- Each module is facilitated by a subject matter expert who will work through the curriculum with the students.
- Contact hours per module not exceed 6-7hs.

CONTINUING EDUCATION CREDITS available through UBC CPD and CSMLS
